Experience

- **Software Developer, Brainstorm Force (CartFlows)** ***August 2025 - Present***

*CartFlows is a WooCommerce-dependent sales funnel plugin with **200,000+** active installations, built on custom DB tables, WordPress hooks architecture, and deep WooCommerce order lifecycle integration.*

  - Overhauled **CartFlows Flow Analytics**, expanding tracked KPIs from **8 to 24** (+200%) with new tabular data views, achieving **zero regression** and no performance degradation on a database-heavy implementation.
  - Engineered a full-featured **interactive Canvas Builder** from scratch using **React and ReactFlow**, dynamically visualizing complete funnel flows and all nested steps in a node-based UI.
  - Resolved **3 critical payment failures**, Stripe Express Checkout blocking transactions, PayPal infinite loading on upsell, and Google Pay misrouting to WooCommerce, cutting payment-related support tickets by **90%**.
  - Conducted a comprehensive **security audit** of the CartFlows plugin and **independently remediated all identified vulnerabilities** spanning all **CVSS severity tiers**, from input sanitization and capability checks to privilege escalation and data exposure vectors.
  - Pioneered **WordPress Abilities API** integration for CartFlows, mapping plugin capabilities as **MCP-compatible tools and resources** within the WordPress MCP server architecture.
  - **Tech Stack:** *PHP, React.js, ReactFlow, JavaScript, MySQL, WordPress, WooCommerce, REST APIs, Git*

- **Software Engineer, Hummingbird Web Solutions Pvt Ltd** ***December 2023 - July 2025***

  - Built a high-performance **Windows application** automating JSON-to-PDF conversion using **C# and .NET**, delivering **20% faster internal workflows** with full CRUD persistence for **10+ designers**.
  - Revamped **50+ React-based** Gutenberg block components, improving accessibility and UX for **4,000+ active users** across the **Responsive Blocks** plugin.
  - Resolved critical security vulnerabilities in a SaaS platform, hardening reliability for **10,000+ active users** including **200+ premium subscribers**.
  - Boosted **Core Web Vitals** score from **71 to 89** (+18 points) by targeting LCP and CLS via lazy loading, DOM optimizations, and layout fixes.

Skills

Core: Data Structures and Algorithms, Database Management, Technical SEO, System Design

Programming Languages: JavaScript (ES6+), PHP, C#, TypeScript, C++, Java (Core), Go

Frameworks/Tech-Stack: React.js, WordPress, Next.js, Magento, jQuery, Webpack

Databases: MySQL, MS-SQL, MongoDB

Technologies: Linux, Git, GitHub, Bitbucket, SVN, Docker, Nginx, Apache, REST APIs, GraphQL

Projects

- **WP Agent AI** ***March 2025***

  - **Tech Stack:** *PHP, JavaScript, React.js, WordPress Gutenberg, OpenRouter API, REST APIs*
  - Engineered an **AI-powered WordPress plugin** that generates fully editable native **Gutenberg blocks** from plain-English prompts, supporting single-section and full-page generation via a **Plan** → **Describe** → **Template** → **Render** pipeline.
  - Integrated **OpenRouter** to expose **11 AI models** (GPT-4o, Claude Sonnet, Gemini, DeepSeek, Llama, and free-tier variants) with a **1-hour prompt cache** (TTL-based) and **rate limiting** (10 req/min/user).
  - Built an **SEO analysis engine** delivering AI-scored content (0–100) with meta title, meta description, and keyword-specific suggestions; added **business context injection** for brand-consistent output across all AI calls.
  - GitHub: (WP Agent AI)

- **CineMix (Front-end Live)** ***August 2023 - Dec 2023***

  - **Tech Stack:** *React.js (v18), REST API, JavaScript, Node.js, MongoDB, Tailwind*
  - Engineered a dynamic movie/TV app with React best practices - lazy loading, skeleton screens, and custom hooks - delivering a faster load time and improved UX for **1,000+ listed titles**.
  - GitHub: (CineMix)

Education

- **Bachelor of Technology in Computer Science and Engineering** ***2019-23***

Datta Meghe College of Engineering, Navi Mumbai CGPA: 8.4

Other Activities

Reading, Trekking, Cricket, Anime
